DETAILED ACTION

Specification

1. Applicant is reminded of the proper language and format for an abstract of the disclosure.

The abstract should be in narrative form and generally limited to a single paragraph on a separate sheet within the range of 50 to 150 words. It is important that the abstract not exceed 150 words in length since the space provided for the abstract on the computer tape used by the printer is limited. The form and legal phraseology often used in patent claims, such as "means" and "said," should be avoided. The abstract should describe the disclosure sufficiently to assist readers in deciding whether there is a need for consulting the full patent text for details.

The language should be clear and concise and should not repeat information given in the title. It should avoid using phrases which can be implied, such as, "The disclosure concerns," "The disclosure defined by this invention," "The disclosure describes," etc.

Information Disclosure Statement

2. The information disclosure statement filed 1/9/06 fails to comply with 37 CFR 1.98(a)(2), which requires a legible copy of each cited foreign patent document; each non-patent literature publication or that portion which caused it to be listed; and all other information or that portion which caused it to be listed. It has been placed in the application file, but the information referred to therein has not been considered.

Claim Rejections - 35 USC § 112

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 14-15 and 23-24 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 14 recites the limitations "at least one cover part" in lines 1-2 and "its cover part" in line 3. There is insufficient antecedent basis for these limitations in the claim.

Art Unit: 3612

Claim 15 recites the limitations "at least one cover part" in lines 1-2 and "its cover part" in line 3. There is insufficient antecedent basis for these limitations in the claim.

For claim 23, the second bearing is recited to be "offset" in the longitudinal direction but it is unclear from what the second bearing is offset.

Claim 24 recites the limitations "a vehicle seat wall" in lines 2-3 and "the vehicle seat wall" in lines 4-5. There is insufficient antecedent basis for these limitations in the claim.

Claim Rejections - 35 USC § 102

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

6. Claims 12-13 and 18-26 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Kaneko et al. (JP '491).

7. Claims 12-17 are rejected under 35 U.S.C. 102(b) as being clearly anticipated by Nakamitsu et al. (EP '673).

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
